3 First MHMD system demo: Digital Assembly 2018 (M20) ........................................................ 38
Introduction

The present deliverable was meant to report the development and outcomes of the first dissemination event, aimed at presenting to a broad public the first prototype of the MHMD system and relevant project developments. This event, however, has been planned for M20, where the EU Digital Assembly (Sofia, 25-26 June 2018), co-organised by the European Commission and the Bulgarian Presidency of the Council of the European Union around the themes of EU digital policy, offered the ideal context for this presentation, at the presence of the relevant stakeholder communities, including industry, SMEs and policy makers. The report will thus detail the demo that has been planned for the upcoming event, while its outcomes will be the object of subsequent relevant deliverables (e.g., D10.7).

This event has not been, though, the only occasion where the project has been showcased. In this first reporting period, the Consortium has been in fact engaged in a thick agenda of public events in the domain of health IT, personal data, AI, blockchain and ICT for health, either organised at institutional level (e.g., eHealth Week), by industry (e.g., HIMSS) or by public initiatives in the personal data ecosystem (e.g., MyData), with different publics and putting in relevance different aspects and implications. The D10.3 deliverable reports therefore on the contents and outcomes of these diversified dissemination opportunities, where the Project Coordinator and other Consortium partners have successfully presented the project in front of relevant academic community, private sector stakeholders or institutions and policy makers, chaired and animated sessions on relevant themes (e.g., personal data, health data, blockchain in health, ICT for health), and created fruitful cross-fertilisation and collaboration opportunities with members of research institutions, private companies, associations and other EU-funded initiatives.

**Theme**

Data Infrastructures for Open Science

**Details**

RDA Plenaries are biannual events, held in different places around the world, which bring together data scientists, librarians, computer scientists, and domain scientists with the goal of creating tangible deliverables that improve data sharing across disciplines, technologies, and countries.

**Organisers**

Barcelona Supercomputing Center-Centro Nacional de Supercomputación (BSC-CNS), Research Data Alliance Europe (RDA-Europe)

**Who**

Edwin Morley Fletcher, Mirko De Maldè and Ludovica Durst, Lynkeus, Rocco Panetta, P&A, and Aggelos Kiayias, Athena RC

**What**

- Participation to a Joint IG Big Data and IG Health Data Topics Exploration Meeting focused on big health datasets and privacy and security issues.
- Chair of the IG Health Data Meeting, entitled Meaningful Health Data for Research and for Industry, on assessing the differences between US, Australia and EU regulation of health data, mapping existing practical policies, relevant projects, and experiences related to health data, identifying other groups’ activities, and considering the value of industry participation in health data and discussing how to engage partners from industry in the HD-IG.
- Chair the of Health Data and Blockchain BoF Meeting, entitled Making use of Blockchain in dealing with Health Data, exploring public and private initiatives in Europe and US addressing the potential of applying the blockchain approach to health data (with presentation of MHMD and of the blockchain) and evaluating the opportunity of establishing a working group on Blockchain in health data to debate its potential and whether the blockchain can ensure compliance with advanced data protection requirements (i.e., GDPR).

**Dissemination**

1.2.4 RDA EU Data Innovation Forum

**When** | 30 January 2018
---|---
**Where** | Brussels, Belgium
**Venue** | The Hotel Brussels

**Details**
The goal of the event has been to collect and converge the different perspectives and push forward new innovative ideas in the overall context of the challenges and opportunities of the European Data Economy and data-driven innovation in Europe mapped to ongoing activities or future challenges to be addressed by RDA WGs & IGs. It also aimed to define a pragmatic list of data challenges to be discussed on a national level to influence the digital national agendas, or form proposals to be further discussed within the next RDA Plenaries.

**Topics**
The role of research data in the Data Economy context and the RDA contribution to the different Data Economy building blocks

**Organisers**
Research Data Alliance (RDA) Europe

**Who**
Edwin Morley-Fletcher, Lynkeus

**What**
Panel on “Short Introduction of blockchain and its possible role in IoT data trading” and presentation of MHMD by Edwin Morley-Fletcher

**Dissemination**
Public

**Event material**
Website, Report
1.2.5 EIP AHA Conference of Partners 2018

When: 27 February 2018
Where: Brussels, Belgium
Venue: European Parliament

Details: European Innovation Partnership on Active and Healthy Ageing Conference of Partners 2018

Theme: Digital transformation of health and care for Active and Healthy Ageing in Europe

Details: A working 2-day meeting, open to EIP on AHA partners and dedicated to reviewing the action plans of the Action Groups and the Reference Sites Collaborative Network, and especially how these plans are aligned with the European Commission policy activities, notably the "Transformation of health and care in the Digital Single Market" Communication currently in preparation.

Organisers: European Commission

Who: Edwin Morley-Fletcher, Lynkeus

What: Public presentation of MHMD

Dissemination: Twitter, Facebook

Public EIP on AHA partners

Event material: Website, streaming, programme

EIP AHA - CONFERENCE OF PARTNERS 2018

2018-02-27 | 08:30 to 18:30 | Streamed
1.2.6 EIH High-Level Symposium "Insuring a healthy health: The winning model"

When: 9 March 2018
Where: Brussels, Belgium
Venue: European Parliament

Theme: Insuring a Healthy Health: The Winning Model
Details: Symposium dedicated to exploring different aspects of the relationship between the changes affecting the healthcare industry and Insurance

Organisers: European Institute for Health (EIH)
Who: David Manset, gnûbila

What: On behalf of the European Federation of Cybersecurity Experts, public presentation of the MHMD blockchain model

Dissemination: Website, Twitter, Facebook
Public: Players from the “Insurance” ecosystem, industry stakeholders and EU institutions policy-makers, representatives from the cyber security sector

Event material: Website, Event page, LinkedIn, Facebook
### 1.2.7 Wired Health

![Wired Health Logo](image)

**When** 15 March 2018  
**Where** Milan, Italy  
**Venue** Milano BASE cultural centre

**Theme** *Innovation for life* (translated from Italian, *Innovazione per la vita*)

**Details** Organised within the *Milano Digital Week*, the event explored a wide range of topics in the domain of information and computer technology (ICT) applied to healthcare: how technology is changing medicine, what are the most recent developments of robotics for health, whether artificial intelligence (AI) could speed up diagnosis or blockchain better protect patient data, as well as most relevant trends at the intersection of medicine, digital technologies and new lifestyles.

**Organisers** Wired magazine, HUMANITAS Research Hospital

**Who** Mirko De Maldè, Lynkeus

**What** Public presentation on the topic *How blockchain can be a valuable tool for safeguard patients’ privacy*, including mention to MHMD

**Dissemination** Website, Twitter, Facebook

**Public** Academia, clinicians, policy makers, industry, SME

**Event material** Articles [1 – event showcase] and [2 – event programme] on Wired magazine
1.2.8 World Summit on the Information Society (WSIS) Forum

Leveraging ICTs to Build Information and Knowledge Societies for Achieving the Sustainable Development Goals (SDGs)

1.3.2 HIMSS Europe Conference and Exhibition 2018

**When** | 27-29 May 2018
---|---
**Where** | Sitges, Spain
**Venue** | Melia Hotel

**Topics** | Digital health, ICT for health

**Details** | The joint HIMSS Europe and Health 2.0 aims to gather digital health professionals from Europe and overseas to explore international innovations in consumer health, patient care, digital healthcare technologies, big data and analytics, AI and wearable tech, to initiate meaningful conversations and to create digital health marketplaces.

**Organisers** | HIMSS Europe

**Who** | Mirko DE Maldè, Lynkeus

**What** | Speaker within two sessions: *Playing with blockchain*, giving an introduction to the blockchain technology through a puzzle game, and *Personal Health Record (PHR) initiative session “Empowering Patients and Citizens to Become CEOs of their Own Health”*, with presentation of MHMD, exploring the emerging landscape of personal health record initiatives, particularly what they promise and how are they delivering on those promises.

**Dissemination** | Website, Twitter, Facebook

**Public** | Clinicians, industry and SME, policy makers, patients associations

**Event material** | Website
## 2 Meetings with interested entities and authorities (M1-M19)

Materials for project showcase

Screens (2)
1. One video in loop about previous projects in ICT for health
2. One videos in loop showing overview of MHMD and other technical information, plus other relevant topics, such as WannaCry cyber-attack and GDPR regulation.

Posters (5)
1. One general overview of MHMD
2. One schematic illustration of blockchain architecture, with data workflows explained
3. One preview of the MHMD user Interface for the different use cases
4. One overview of healthcare analytics for anonymised data under development
5. One overview of GDPR and how MHMD has reached full compliance in regard to its different aspects

Demos (4)
1. One demo showing techniques for automatic classification, encryption and encoding of different types of data (e.g., pseudo & anonymisation, privacy impact assessment, etc.)
2. One demo of the Data Catalogue
3. One demo of the MHMD User Interface along with its four different use cases:
   a. individual register data (in the app): login, connect to digi.me, select permissions, upload
   b. hospital register data (in the website): what types of data will be released
   c. researcher consumer data (website)
   d. pharma consumer data (website)
4. Demo of different types of healthcare analytics under development
